PROJECT WORK/TRAINING

Full Stack Developer   *June 2018 - November 2018*

Worked as Full Stack Developer at *Loop Reality, Hyderabad* and designed a dashboard system for company's clients which helps them in scheduling assessments for their employees. Optimized their main website *perspect.ai* for a better google page score. Developed Back-end for the dashboard using AWS lambda functions in node.js. Currently making changes to their landing page.

Software Developer   *June 2017 – July 2017*

Worked as Software developer at *Around The Globe, Bangalore* and developed test cases for website and tested it for various bugs. Used Laravel Framework for developing the website and fixed the bugs.

Building Participatory Game   *January 2018 - Ongoing*

Creating a participatory game that enables all stakeholders, in agriculture, to understand the results of their decision using Unity3D as a part of Final Year
B.Tech Project.

Smart Attendance Management System   *Sept 2017 – Nov 2017*

It is a mobile app for the SAMS Project and helps teachers to take and maintain attendance in the class more efficiently. Developed using Ionic Framework.

Movie Review Portal & PokemonGO Search Engine   *Feb 2017 – April 2017*

The project was made using PHP, MySQL, HTML, CSS and was done as course project for DBMS course
